

E-FG7/TW

දිග්බදු Digital Fence

FG7 - Taut wire controller

The taut wire controller FG7 is a seven-inch LCD display screen that can be used to control up to 31 taut wire sensors.

Features:

- Graphic images of the site with zones and the fence condition can be displayed on the LCD screen
- Commands can be sent to the taut wire sensors to configure them and adjust their sensitivity.
- Logs containing system details are recorded.
- Allows for three different types of user with different access levels to be set up.
- Can be configured to allow TCP/IP connectivity for integration with third - party software and systems.

Specifications:

Enclosure size: H140mm x W200mm x D35mm

Weight 450grams

Operating temperatures -10°C – 55°C

Operating humidity 10% – 90% (non-condensing)

Mains supply voltage 10 – 15Vdc

Current consumption 450mA with the LCD display on
